SKILLS

PROGRAMMING

Over 5000 lines:
Javascript(ES6) • Solidity

Over 1000 lines:
TypeScript • RUST • GraphQL

Frameworks:
React • NextJS • Hardhat
Foundry • Ethers.js • TailwindCSS
Chai.js • Express

Others:
Wagmi • Prisma ORM • MongoDB

CERTIFICATIONS

LUSTER NETWORK
(CryptoNaukri)

Certified Ethereum Developer
Aug 2023
Earned the **Certified Ethereum Developer** certification by achieving an **A-grade** in the cohort

EDUCATION

KTU UNIVERSITY
BTech in Computer Science
2018 - 2023 | Kerala

EXPERIENCE

MINOID | Full Stack Blockchain Developer
Aug 2022 - Present | Austin, Texas

- Develop cutting-edge blockchain applications on **L1/L2** such as **Ethereum** and **Polygon**
- Integrate front-end and back-end seamlessly with tools like **Viem**, **Wagmi**, **Ethers.js** or **Web3,js**.
- Test and debug with precision using tools like **Chai**, **Hardhat** and **Foundry**.
- Integrate **NestJS** with **Prisma ORM** to seamlessly interact with databases and manage blockchain-related data.
- Enable smooth cryptocurrency payments with tools like **MetaMask**, **WalletConnect**.
- Scale applications for performance with tools like **Alchemy**, **QuickNode** or **Infura**.
- Document and share knowledge with tools like Git, GitHub, or GitLab.

NEWSCRYPTO | Community Manager
Sep 2021 – Jun 2022 | Slovenia

- Stay informed about industry trends and competitors for growth opportunities.
- Provide disciplined customer support to community members across **Middle-East** and **Asia**.
- Educate the community about **Crypto-Market analysis** and **Blockchain technology**.

PROJECTS

MEDINSURE

- This project demonstrates a Medical Insurance Claiming platform where patients can initiate on-chain claim requests and ensure swift fund release through collaborative review by hospitals and insurance authorities.

  Stack Used: Solidity, NextJS, Infura, IPFS, Viem, Wagmi, Hardhat, TailwindCSS

DAOMIND

- A Decentralized Autonomous Organization(DAO) where members can cast their votes for proposals in a decentralized environment.
- A parallel Fake NFT-Marketplace is created that mints NFT to proposal-creator if positive vote-count exceeds negative vote-count.

  Stack Used: Hardhat, Ethers.js, React, Alchemy, Solidity, Web3Modal

PRESALE-PORTAL

- NFT minting platform enabled with Pre-sale mints for whitelisted users and Public-sale mints.

  Stack Used: Solidity, Openzeppelin, Hardhat, Ethers.js, QuickNode, NextJS
